

# Indian Tool Kit Bag

These reproduction Indian Tool Kit Bags are made with heavy weight canvas and stitched with heavy duty thread. They are made the same size as the original, which is approximately 5" x 9". The cotton string is actually a very strong, washable cording. In all my years dealing with Indian motorcycles I have seen very few Indian tool bags. The later military Indians didn't have the logo on the bag because the government was getting rid of company names for security reasons. Bag looks nice for display, but is very functional holding your tools and put in your toolbox. Either bag can be tea dyed to give it that 'old' look.
